

Glycosyltransferase Affinity Gel - CDP

Description:	Cytidine-5'-diphosphate coupled via spacer to a gel matrix.
CDP-concentration:	> 10 μmol CDP per ml gel slurry (method: UV-Spectroscopy after hydrolysis with 1 M HCl)
Application:	purification of sialyltransferases by affinity chromatography
Order no:	5080
Form of delivery:	grey-white suspension with 20% ethanol
Storage:	4°C, do not freeze !
