

12- α -hydroxysteroid-dehydrogenase

E.C. 1.1.1.50

Description: An enzyme which, among other things, is involved in the metabolic processing/ oxidation of bile acids to cholesterol.

Origin: *Clostridium sp.*

Activity: > 100 U/mL
(method: ASA Spezialenzyme GmbH)

Specific activity: > 1,5 U/mL

Application: chemical synthesis

Parameters of reaction: pH: 8,0
temperature: 25°C

Order-No.: 1800

Form of delivery: liquid

Stability: stabile at -20°C

Storage: store at -20°C
