

Desferrioxamin E

Nocardamin

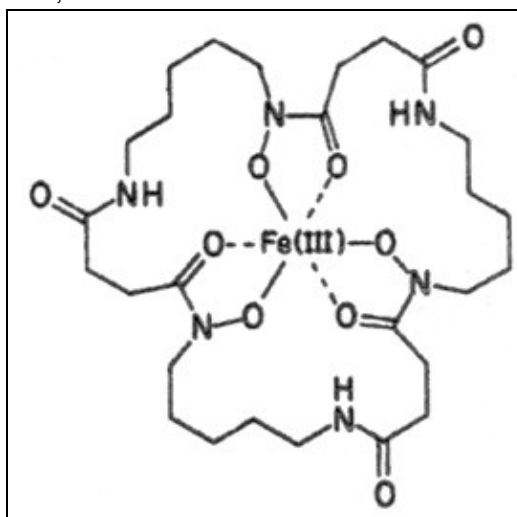

Description: Siderophore, complexing agent

Origin: *Streptomyces olivaceus*

Application: Additive for de-rusting agents;
research

Beige powder

Molecular weight: 544,7 D

Structure:

Effect: Binding of iron(III)-ions by very stable chelate-complexes,
Production of the bioavailability of iron for the producer

Purity: 70 – 90%

Solubility: very bad

Handling: no special precautions, harmless

Order-No.: 5020

Storage: room temperature
