

γ -Glutamyl hydrolase

Turkey pancreatin; E.C. 3.4.19.9

Description: Enzyme preparation for release of folic acid from natural resources

Catalysed reaction:

Origin: *Turkey pancreas*

Application: Folic acid analytics

Activity: One 10 mL glass vial contains the enzymatic activity needed for 50 raw material preparations (quantitative release of folic acid from 1 g substrate each)

Article-no.: 2800

Form of delivery: Beige lyophilizate

Stability: Stable at -20°C

Storage: - 20°C
